

PureWorx™ Microfibre cloths to be used in conjunction with PureWorx™ are 100 times finer than a human hair. This unique wedge shape fibre allows the cloth to lift dirt and dust and trap them within the fabric, acting as a “dirt magnet”. Because of this fineness, the cloth can clean a large surface area perfectly and leave the surface streak free. The cloths are 400mm x 400mm and are 350gsm high quality cloths with up to 3,000 washes. Wash separately and use warm water.

The HACCP certification process is arduous and has strict protocols. PureWorx™ cleaner and degreaser is certified to be used in a commercial food environment and incorporated into a food safety plan.

Kills bacteria*
*** independently tested -**
for the reduction in bacterial load on
S.Aureus / E.Coli / S Choleraesuis

Caution:
 Keep out of reach of children.
 Do not spray product towards the eyes.
 If splashed in the eye, flush with water.
 If swallowed drink plenty of water.

Best kept stored in a cool dark place

Not harmful to Humans,
animals, or the water table

Made in Melbourne
100% Australian owned

mineralised aqua solution

Welcome to PureWorx™, the HACCP certified, earth friendly cleaning and degreasing liquid product, that reduces bacterial load, on most surfaces, yet it is safe for humans, animals and the water table

www.PureWorx.com

PureWorx™ is the perfect solution to your cleaning needs including:

- Benches
- Cupboards
- Stainless steel
- Range hoods
- Stove tops
- Combi ovens
- Kitchen floors
- Lighting
- Bathroom mirrors, washbasins and toilets
- Front of house tables and chairs / menu covers
- Glass and glassware
- Stain removal
- Rubbish bin cleaning and odour removal

There are many benefits of using this type of cleaning solution

- There is no risk of fire or explosive accidents
- Work environments and conditions can be significantly improved, using only one product
- No harmful gasses or odours that can cause health issues
- Ease of use
- Rustproofing is also a benefit. Rust is caused by having the chlorine ion, Pureworx does not have this ion and hence it can be used in this manner
- PureWorx™ does not cause harmful skin irritation or chemical burn, it has a sterilizing effect on the skin
- PureWorx™ adds nothing back to the water table, but natural water and salt
- PureWorx™ eradicates harmful food bacteria

The process of making PureWorx™, starts with normal tap water being introduced to a machine that produces pure filtered water. The water is then mixed at an exact ratio to Potassium Carbonate, a natural salt found in plant life. It is refined commercially and used in food production, making soap, glass and china amongst many other things. It has no harmful effects on nature.

Now the liquid is passed through another machine that charges the liquid with electricity, this charge makes PureWorx™ increase its pH potential. Using this format ensures that the pH required is stabilized and can be used up to 24 months from date of production.

PureWorx™ is cost effective and replaces chemical equivalents. It is eco- friendly and easy to use with a long shelf life. It is perfect for use in every environment.
